SUMMARY

Senior Frontend Engineer with 8+ years of commercial experience building data-heavy dashboards, admin panels and business web applications with React and TypeScript. Started frontends from scratch and set up their architecture: routing, authentication, role-based access control, theming and end-to-end tests. Production backend experience with Node.js, Express and MongoDB; recently designed, built and deployed a full-stack app with Node.js, Fastify, PostgreSQL, Docker and CI/CD. Uses AI coding tools (Claude Code) daily in the development workflow.

EXPERIENCE

Frontend Developer — Maya B

Mar 2024 – Present · Project: Delikeys

- Built from scratch the new frontend of Delikeys 2.0, an internal logistics platform for processing parcels, orders and carriers, used in operations in Florida, USA; primary frontend developer on the project.
- Set up the application architecture: routing, authentication, Ant Design theming, ESLint and Prettier, path aliases.
- Built order management screens, including order tabs filtered by shop/marketplace and customs declaration screens.
- Built the barcode scanning page and shipping label printing through authorized file URLs to a local print agent.
- Implemented role-based access control in the UI: routes, menu items and write actions gated by user permissions.
- Created the Playwright end-to-end test suite and kept the codebase passing the GitLab CI lint gate.

Stack: React, TypeScript, React Query, Zustand, Ant Design, Tailwind CSS, React Hook Form, Zod, Vite

React Developer — Brightgrove

Nov 2022 – Dec 2023

- Developed a web application for managing SEO promotion of websites: a dashboard with per-site statistics in tables and charts.
- Built views that let the team track the effect of promotion actions applied to specific sites.
- Worked in an Agile process with Jira.

Stack: React, TypeScript, React Query, Zustand, Ant Design, Tailwind CSS, React Hook Form, Zod, Axios

React Developer — Shark Software

Jan 2022 – Aug 2022

- Estimated and started a commercial rental property website from scratch; designed the base architecture before other developers joined the project.
- Integrated the Google Maps API for place search and displaying locations on the map.
- Implemented form validation with React Hook Form and Yup.
- Worked in two-week sprints combining Scrum and Kanban, with a Trello board.

Stack: React, Redux (thunk), Material UI, React Hook Form, Yup, Axios, React Router 6, slick-carousel

React Developer — GoInteractive

Jun 2020 – Dec 2021

- Built the entire frontend of an application that generated emails from templates based on user data; code reviewed by a senior React developer.
- Used functional components and Redux hooks throughout the application.
- Developed a React admin panel for dynamically managing the content of the company's corporate website.

Stack: React, Redux, Ant Design

React Developer — VIDAX
Apr 2019 – Nov 2019

- Developed an application for configuring electronic equipment used in supermarkets.
- Implemented new features, page layouts and business logic with React and Redux.

Stack: React, Redux

Junior JavaScript Developer — TechStack
Jan 2018 – Apr 2019

- Developed backend features with Node.js, Express and MongoDB for an application serving restaurants and resorts (over one year of commercial work).
- Built the mobile application with AngularJS, Ionic v1 and Cordova: extensive layout work and business logic.
- Implemented new features and fixed bugs across the frontend and backend.
- Built components and page layouts for the React + MobX web version and refactored parts of the MobX stores (about 3 months).

Stack: Node.js, Express, MongoDB, AngularJS, Ionic, Cordova

PROJECTS

MyGym — full-stack workout tracker
Live: 91.232.30.91 · GitHub: github.com/SergioBurlaka/MyGym

Node.js, Fastify, TypeScript, PostgreSQL, Drizzle ORM, React, TanStack Query, Tailwind CSS, Docker, GitHub Actions

- Designed a REST API with Zod validation on every endpoint and per-user data isolation covered by integration tests.
- Implemented JWT authentication with rotating refresh tokens stored as hashes, argon2 password hashing and rate limiting.
- Built a progression engine that suggests weight and rep increases from workout history, plus personal records and estimated 1RM.
- Built a React PWA with TanStack Query, charts (Recharts), English/Ukrainian localization and autosave.
- Dockerized the stack (PostgreSQL, API, SPA, nginx) with CI/CD via GitHub Actions (tests → deploy to VPS).
- Developed with an AI-assisted workflow using Claude Code.

SKILLS

- **Frontend:** React, TypeScript, JavaScript (ES2022+), HTML, CSS
- **State & data:** TanStack/React Query, Redux Toolkit, Redux (thunk), Zustand, MobX
- **UI:** Tailwind CSS, Ant Design, Material UI, Recharts
- **Forms & validation:** React Hook Form, Zod, Yup
- **Backend:** Node.js, Fastify, Express, PostgreSQL, Drizzle ORM, MongoDB, REST, JWT auth
- **Testing & tooling:** Playwright, Vitest, Git, Vite, Docker, GitHub Actions, GitLab CI, Jira
- **AI:** Claude Code (AI-assisted development)

EDUCATION

National Technical University "KhPI", Sep 2004 – Jan 2010
Faculty of Physics and Engineering; qualification: engineer-physicist (computer modeling of thermal processes).

LANGUAGES

Ukrainian — native · English — Intermediate+ (B1+)
